

EDSMRE

PhD actors at ED SMRE

The doctorate is a professional research experience that will allow you, in 3 years, to access the highest level of qualification in France, the rank of doctor.

Research Laboratory

He welcomes you and gives you the means to conduct your work. It is the most immediate setting of scientific life.

It provides a framework for researchers who can, if necessary, form teams within it. It is headed by a director who is responsible for the research unit he heads.

The doctoral school Sciences of Matter, Radiation and Environment:

This is the school to which you belong. She organizes your training and assists you in the preparation of your doctoral training. It ensures a regular follow-up of the good progress of your thesis in collaboration with the laboratories and thanks to the setting up of the Committee of follow-up of thesis. It is led by a director and his council, including elected representatives of doctoral students who follow and animate the life of the ED.

Supervisor :

Researcher who has HDR.

He advises and guides you throughout your PhD. It brings you a scientific and personal supervision.

He may be assisted by a co-director and, where appropriate, by a co-supervisor.

The doctoral college:

It is in charge of the animation and coordination of the 7 regional doctoral schools.

Thanks to the ADUM application, it implements and pools a transversal training of excellence for PHD students.

The doctoral college reinforces interdisciplinarity and internationalisation, prepares the professional insertion of the doctorate and promotes the doctorate in the socio-economic environment.

The director of doctoral studies

Depending on your field of doctorate, it monitors the progress of your thesis and each year, it validates your training credits.

Registration Establishment:

Institutions of higher education and research with which you are registered administratively as a doctoral student.

He delivers the doctorate degree.

As a PhD student, you are the main actor of your doctoral project and you are not alone. Benefit to train you in the research work: by participating in the life of the laboratory, diversifying your skills through doctoral training, enhancing your work and your experiences (publications, participation in symposia, seminars ...), by weaving a network of research, by engaging in associative life (<https://www.facebook.com/assoc.lille.phd.adsl/>).
